Mother/Baby Care

Every two minutes somewhere in the world, a woman dies of pregnancy complications. Ten percent of newborns succumb to a preventable cause of death. Almost all these deaths occur in resource-poor settings. The object of this Cluster is to equip participants with the essential skills to preserve the life of mothers and their babies.

Skills practice during this course include: Manage dystocia and provide supportive newborn care.

At the completion of this course participants will be able to:

• Provide effective family planning services
• Provide appropriate prenatal care
• Manage common complications of delivery
• Provide appropriate newborn care
• Manage common newborn diseases
• Empower others to provide these essential services

Faculty:

Don Philgreen, MD has been a family physician for 35 years and faculty member with the Research Family Medicine Residency since 1996. He is also medical director for the LIGHT House and Rachel House ministries that assist young women who are involved in crisis pregnancy. Dr. Philgreen’s medical experience includes four years of service to the Pima and Papago on the Gila River Indian Reservation. Dr. Philgreen is one of the INMED founding board members.
